

The diagram illustrates a system architecture with the following components and interactions:

- Service 102** and **Session Manager 104** are connected by a bidirectional arrow.
- Session Manager 104** sends **Session Information 120** to **Authentication Manager 106**.
- Authentication Manager 106** sends **Group Information 122** to **Device Manager 108**.
- Authentication Manager 106** sends **Session Information 124** to **Device Manager 108**.
- Device Manager 108** sends **Device Report 126** to **Device Service 110**.
- Device Service 110** sends **Allocation Request 128** to **Device Manager 108**.
- Device Manager 108** sends **Device Report 130** to **Desktop Unit 112**.
- Authentication Manager 106** sends **Configuration Information 138** to **Desktop Unit 112**.
- Device Manager 108** sends **Allocation Request 132** to **Desktop Unit 112**.
- Device Service 110** sends **Device Data 134** to **Desktop Unit 112** (indicated by a dashed arrow).
- Desktop Unit 112** is connected to **Rendering/Keyboard/Audio etc. 136**, **Devices 116**, **Display 114**, and **Devices 118**.

The components are grouped into three main sections:

- Service/Manager Section:** Service 102, Session Manager 104, Authentication Manager 106.
- Device/Service Section:** Device Service 110, Device Manager 108.
- User/Output Section:** Desktop Unit 112, Rendering/Keyboard/Audio etc. 136, Devices 116, Display 114, Devices 118.
